★★★★★  
**No Hesitation and No Rush**

"The Coravin totally changed how I look at my wine collection. I no longer hesitate when I want to just have one glass from a nice bottle. There's no rush to finish it."

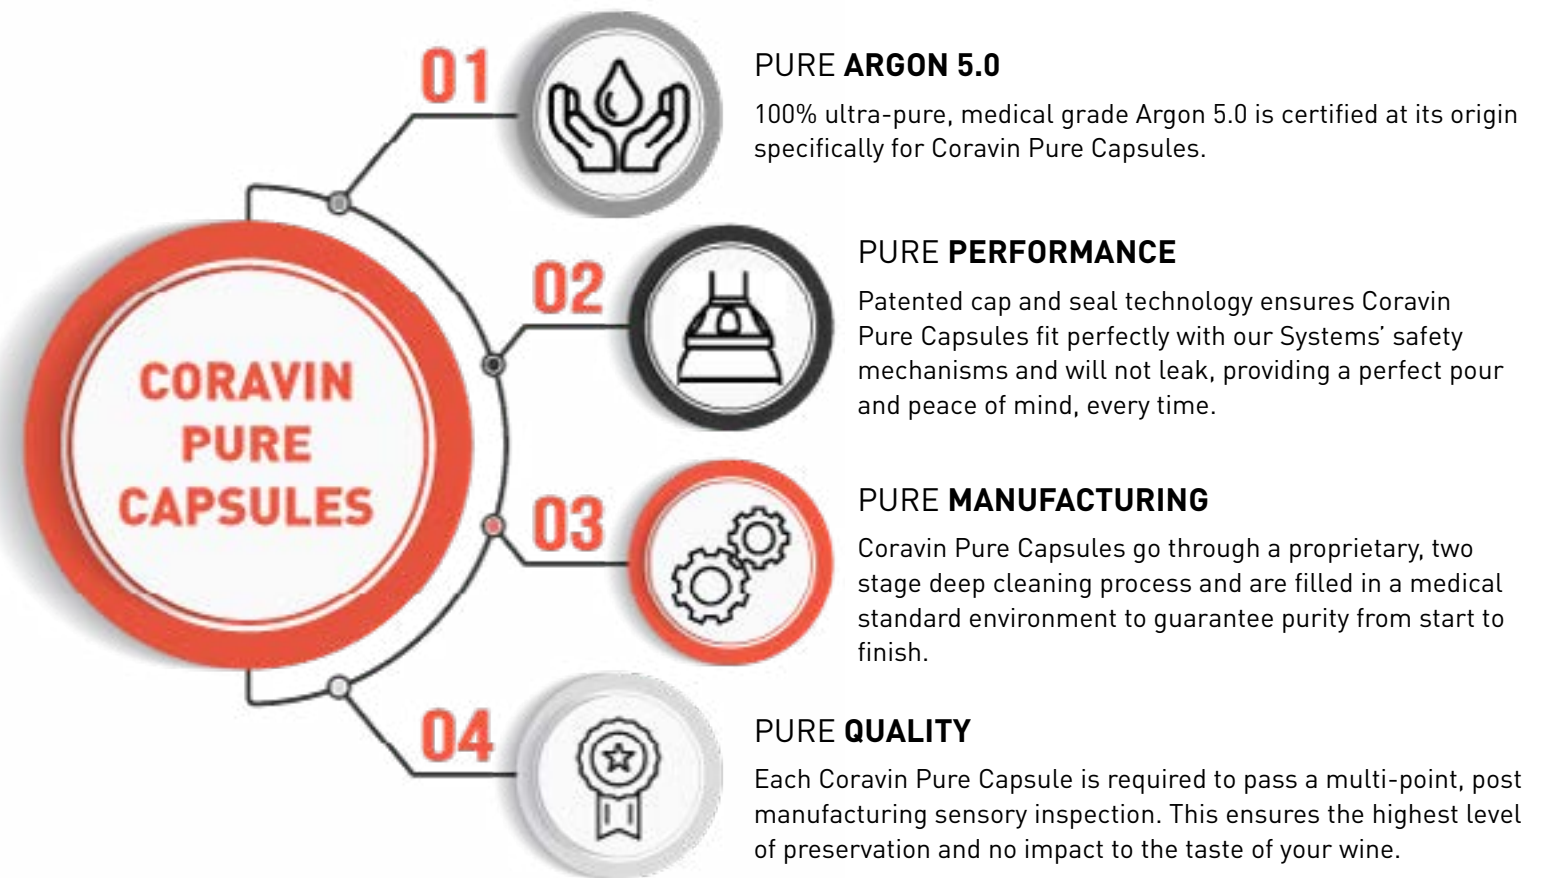

—David K., May 2017

**CORAVIN PURE CAPSULES**

Coravin Pure Capsules power all Coravin Wine Preservation Systems, by pressurizing an unopened bottle of wine with Argon gas to pour a sip, a glass, or more. **But not all Argon gas is born equal.** Only Coravin Pure Capsules utilize our proprietary Four Point Purity Process.

From sourcing, to manufacturing, to packaging and quality testing, only Coravin makes sure that the Argon that is in contact with your wine is the very purest on earth. Only Coravin Pure Capsules are designed to work with our Coravin Wine Preservation Systems. The patented cap fits seamlessly with the safety mechanisms inside all Coravin Systems to ensure flawless interaction between the system and the capsule for a perfect seal, maximum performance, and ultimate safety.

## HOW TO USE

### INSERT

Push the Needle through the cork.

### TIP

Tip the bottle as if you are pouring from an open bottle.

### POUR

Press and release the trigger to pour into your glass.\*

### AND PRESERVE

Pull the System straight up to remove the Needle from the cork. The cork will reseal naturally and continue to protect your wine for weeks, months, or even years.

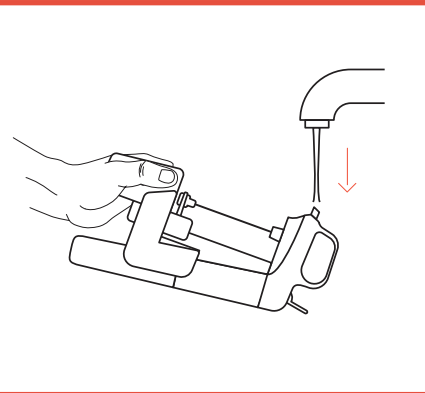

\*For Model Eleven, simply tip and the System will automatically pour!

## HOW TO CLEAN

### RINSE OFTEN

Rinse daily with warm water, through the spout and out the Needle, for 30 seconds. Rinse when switching from one type of wine to another.

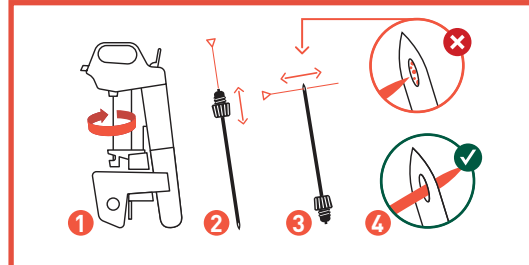

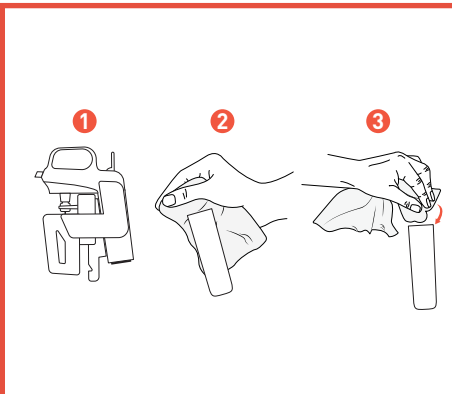

Dry with clean cloth.

### THOROUGHLY CLEAN

Before inserting a new Coravin Capsule, clean the threads inside the capsule cup with a warm, damp, lint free cloth.

This ensures a tight seal where the Cup and the System connect, and no wine residue build-up.

### NEEDLE CARE

If the Needle is clogged with wine sediment or cork particles, unscrew it from the Coravin System and remove.

Using the Needle Clearing Tool that came with the System, insert it through the eye of the needle to clear.

Insert the Clearing Tool through the top of the Needle to push particles down and out towards the tip.

Repeat by poking any remaining particles through until the needle is cleared.

# CORAVIN IS CHANGING THE WAY THE WORLD DRINKS WINE

As the leading global wine tech company, Coravin is using technology to change the way the world drinks and thinks about wine. We believe that wine sparks the senses and plays a pivotal role in creating memorable moments.

We're encouraging people to bottle their memories, letting a single glass transport them back to that moment, days, or even years later, without compromising the integrity of the wine.

## Taste Wines for Pairings

"I can taste 3 or 4 different wines—to see which pairs the best with a meal—and then open that bottle. And the tasted bottles stay as fresh as the day they were bottled at the winery. I don't worry anymore about a wine going bad."
